

# Final Team Report

Asim Khan, Yucheng Shen

December 3, 2023

## 1 Project Overview

Our project, the Personal Finance Tracker, aimed to create a user-friendly tool for managing personal finances. We focused on features like budget creation, spending tracking, and financial reporting to empower users in their financial journey.

## 2 Team Contract Summary

The team contract for the CMPSC 431W course, involving team members Asim Khan and Yucheng Shen with Asim Khan as the team leader, outlines several key agreements and expectations for successful collaboration.

Behavioral Expectations:

Yucheng Shen: Emphasizes the importance of open communication to facilitate the sharing of ideas, feedback, and concerns.

Asim Khan: Focuses on providing proofreading, ensuring that work is checked and feedback is given according to set criteria or personal standards.

## 3 Project Execution

- Planning: We follow the principles outlined in our team contract, focusing on open communication and collaboration.
- Skill Utilization: Each team member leveraged their strengths, with Asim focusing on data integrity and Yucheng on structuring the project.

The development process was largely in line with our team contract. Regular communication ensures we have enough working time to meet the deadlines for each stage. We divide tasks well between working together and independently. We learned the importance of flexibility in project management and the need for continuous user feedback for improvement.

This project is a successful endeavor in creating a management tool with knowledge we have learnt in CMPSC 431W. Our team's commitment to collaboration, open communication, and mutual respect was instrumental in achieving our goals.
